- C-3: STATE RESOURCE RECOVERY AGENCIES

# FOREWORD

The main purpose of the National Recycling Directory is to encourage recycling and the manufacturing of products made from recycled or recovered materials. This directory can be used to assist individuals, organizations, government, businesses, and institutions in their recycling efforts by providing information on markets for secondary materials. Federal, state, and local governments should find the directory useful in their efforts to procure products made from recycled materials. Scrap processors and dealers can use it to aid in locating the closest or most suitable market for their materials. Community and other non-profit recycling programs will be assisted in locating the best markets for their recovered materials.

Many buyers specify grades, sizes, minimum or maximum quantities, types, weights, amount of allowable contamination, or other conditions for materials that they purchase. Also, prices offered are quite variable. Sorting, cleaning, and properly packaging materials will improve the market value of the recyclable materials to be sold. It is advisable to contact prospective buyers to determine what specifications should be met before storing or delivering any materials. Some markets will provide storage containers, processing equipment and/or help with transportation.

# INTRODUCTION

This directory was prepared by the Resource Recovery Subsection, Florida Department of Environmental Regulation under a purchase order agreement with the National Bureau of Standards, U.S. Department of Commerce. It focuses on manufacturers and/or distributors of products made from waste materials. The directory is one approach being taken by the U.S. Department of Commerce to fulfill its obligations as outlined in Subtitle E, Section 5003 (1,2,3) of the Resource Conservation and Recovery Act (PL 94-580). The National Bureau of Standards has been delegated the responsibility to "identify the geographical location of existing or potential markets for recovered materials."

Considerable effort has been made to make this directory as up- to-date and complete as possible with the information that is currently available. As with all listings of this type, omissions and changes will occur. The National Bureau of Standards should be contacted regarding any additions or changes which should be included for future printings of the directory.

The assistance and enthusiasm of many state solid waste agencies, trade associations, and recycling organizations in providing information is greatly appreciated.

## EXPLANATION OF DIRECTORY FORMAT

The companies listed in this directory manufacture products which contain some recycled or recovered material. The directory consists of separate sections for the types of materials used. The seven categories of materials are glass, ferrous metals, non-ferrous metals, paper, plastic, rubber, and textiles. Within each section, the states are listed in alphabetical order. The companies are listed in alphabetical order under the state in which they are located.

The listings do not include those companies which are exclusively dealer/processors, tire retreaders, energy recovery facilities, or are involved in the recovery of used oils, solvents, or chemical wastes. These companies can be located by consulting the appropriate organizations or directories listed in Appendices B and C of this directory and the yellow pages of local telephone directories.

TABLE I: USES OF RECOVERED MATERIALS

| | RECOVERED MATERIALS USED | PRODUCTS |
|---|---|---|
| FERROUS METALS | tin and bi-metal cans, tin-free steel cans, iron scrap, steel scrap, old automobiles | cans, tin ingot, steel tubular goods, steel castings, iron and steel fabrication, iron castings, manhole covers, copper precipitation |
| GLASS | bottles, jars, cullet | brick, terrazzo, foamed glass products, glass wool insulation, glassphalt, abrasives, reflective material for paint, glass containers, glass polymer composites |
| NON-FERROUS METALS | | |
| Aluminum: | cans, foil trays and pie pans, insulated aluminum wire, aluminum scrap | secondary aluminum ingot, sheets for can manufacturers, cans, aluminum shot, doors, windows, extrusions |
| Other: | lead batteries, lead scrap and alloys<br>nickel alloys<br>copper wire, brass and bronze scrap<br>zinc scrap | pure lead and lead alloys, fishing sinkers and net weights, solder<br>recovered nickel<br>recovered copper and brass<br>zinc dust, metal and anodes |
| PAPER | corrugated, newspaper, grocery bag wastes, kraft, envelope cuttings, books and magazines, computer print out, white ledger, tab cards, mixed waste paper | insulation, tissue, newsprint, linerboard, corrugating medium, boxboard, chipboard, construction paper and board, protective packaging, paper bags, nursery pots, roofing felt, printing and writing paper, stationery |
| PLASTIC | low density polyethylene, polypropylene, polystyrene, polyvinyl chloride, polyethylene containers, thermoplastic scraps, scrap resins and powders | low density polyethylene film, reprocessed or reclaimed thermoplastic reslin, polyehtylene and polypropylene, drainage products, toys, boats, artificial flowers |
| RUBBER | tire inner tubes, used tires, synthetic rubber scrap | asphalt additives, jetty and seawall coating, lining sheets, highway guard rails and shock absorbers, rubber mats, carpet padding and lining, floor coverings, rubber conveyor and power transmission belts, automotive hoses, a variety of molded parts and extrusions, athletic court surfacing, new tires, rubber footwear, reprocessed synthetic rubber |
| TEXTILES | used clothing, garmet manufacturing waste, textile mill by-products, cordage and twine, yarn wastes | wiping rags, fabric stock for recycling, felt goods, padding and upholstery filling, floor mops, industrial mats, fine writing paper |

10. SUPPLEMENTARY NOTES

☐ Document describes a computer program; SF-185, FIPS Software Summary, is attached.

11. ABSTRACT (A 200-word or less factual summary of most significant information. If document includes a significant bibliography or literature survey, mention it here)

The directory focuses on manufacturers and/or distributors of products made from waste materials.. Companies listed in the directory manufacture products which contain some recycled or recovered material. The directory consists of separate sections for the types of recycled materials used: glass, ferrous metals, non-ferrous metals, paper, plastic, rubber, and textiles. The states are listed alphabetically within each subsection, and the companies are listed alphabetically under the state in which they are located.

12. KEY WORDS (Six to twelve entries; alphabetical order; capitalize only proper names; and separate key words by semicolons)

directory; ferrous metals; glass; non-ferrous metals; paper; plastic; procurement; purchasing; recycling; resource recovery; rubber; textiles
